If the contractor believes that any particular work is not within the scope of the project, is a material change, or will otherwise require more compensation to the contractor, the contractor must immediately notify the City in writing of this belief. If the City believes that the particular work is within the scope of the contract as written, the contractor will be ordered to and shall continue with the work as changed and at the cost stated for the work within the scope.

39. CONTRACTOR PERSONNEL: The City of Naples shall, throughout the life of the contract, have the right of reasonable rejection and approval of staff or subcontractors assigned to the work by the contractor. If the City reasonably rejects staff or subcontractors, the contractor must provide replacement staff or subcontractors satisfactory to the City in a timely manner and at no additional cost to the City. 41. EXCEPTIONS: Proposers taking exception to any part or section of the solicitation shall indicate such exceptions on the proposal form. Failure to indicate any exception will be interpreted as the proposer's intent to comply fully with the requirements as written. Conditional or qualified proposals, unless specifically allowed, shall be subject to rejection in whole or in part.

42. FAILURE TO DELIVER: In the event of the contractor to fail to deliver services in accordance with the contract terms and conditions, the City, after due oral or written notice, may procure the services from other sources and hold the contractor responsible for any resulting purchase and administrative costs. This remedy shall be in addition to any other remedies that the City may have.

43. FAILURE TO ENFORCE: Failure by the City at any time to enforce the provisions of the contract shall not be construed as a waiver of any such provisions. Such failure to enforce shall not affect the validity of the contract or any part thereof or the right of the City to enforce any provision at any time in accordance with its terms.

44. FORCE MAJEURE: The contractor shall not be held responsible for failure to perform the duties and responsibilities imposed by the contract due to legal strikes, fires, riots, rebellions and acts of God beyond the control of the contractor, unless otherwise specified in the contract.

The City may make reasonable investigations deemed necessary and proper to determine the ability of the proposer to perform the work, and the proposer shall furnish to the City all information for this purpose that may be requested. The City reserves the right to reject any proposal if the evidence submitted by, or investigation of, the proposer fails to satisfy the City that the proposer is properly qualified to carry out the obligations of the contract and to complete the work described therein. The records so created shall be open to inspection by the City.

49. RECOVERY OF MONEY: Whenever, under the contract, any sum of money shall be recoverable from or payable by the contractor to the City, the same amount may be deducted from any sum due to the contractor under the contract or under any other contract between the contractor and the City. The contractor understands and agrees that this is a requirements contract and that the City shall have no obligation to the contractor if no services are required. Any quantities that are included in the scope of work reflect the current expectations of the City for the period of the contract. The amount is only an estimate and the contractor understands and agrees that the City is under no obligation to the contractor to buy any amount of services as a result of having provided this estimate or of having any typical or measurable requirement in the past. The contractor further understands and agrees that the City may require services in excess of the estimated annual contract amount and that the quantity actually used whether in excess of, or less than, the estimated annual contract amount and that the quantity actually used

shall not give rise to any claim for compensation other than the total of the unit prices in the contract for the quantity actually used.

51. TERMINATION FOR CONVENIENCE: The performance of work under the contract may be terminated by the City in whole or in part whenever the City determines that termination is in the City's best interest. Any such termination shall be effected by the delivery to the contractor of a written notice of termination of at least seven (7) days before the date of termination, specifying the extent to which performance of the work under the contract is terminated and the date upon which such termination becomes effective. After receipt of a notice of termination, except as otherwise directed, the contractor shall stop work on the date of the receipt of the notice or other date specified in the notice; place no further orders or subcontracts for materials, services or facilities except as necessary for completion of such portion of the work not terminated; terminate all vendors and subcontracts; and settle all outstanding liabilities and claims.

The seven-day period will begin upon the mailing of notice by the City. If the contractor fails to cure the default within the seven (7) days specified in the notice and the contract is terminated for failure to perform satisfactorily, the contractor shall be entitled to receive compensation for all reasonable, allocable and allowable contract services satisfactorily performed by the contractor up to the date of termination that were accepted by the City prior to the termination. In the event the City terminates the contract because of the default of the contractor, the contractor shall be liable for all excess costs that the City is required to expend to complete the work under contract.

PURPOSE OF REQUEST

The following Request for Proposal (RFP) has been developed to solicit information from consulting engineering firms (or teams of firms) proven to be qualified and experienced in civil, roadway, transportation engineering, stormwater management, landscape architecture, including street scape design and construction supervision. The purpose of this RFP is to contract with a firm to provide design services related to the improvements between 9th street (US

41) and the soon to be developed Jay and Patty Baker (Baker) Park, along Central Avenue, Naples, FL 34102.

BACKGROUND

The City of Naples Community Redevelopment Agency (CRA) was created in 1994 by City Resolutions 94-7098 and 94-7099. The boundaries of the CRA are shown on the CRA District Map (Refer to Exhibit A for area map). On January 15, 2014 City Council adopted Resolution 14-13401 approving a modified Redevelopment Plan. Central Avenue Improvements is a component of the 2014 modified plan.

Central Avenue is a major East – West connector between 9th street (US 41) and Goodlette Frank Road. The average two way volume (vehicles per day) during 2008 and 2010 was 6,890. Significant increase in use of Central Avenue is anticipated as a result of the soon to be constructed Jay and Patty Baker Park by the City, as well as two new residential developments. The Collier County MPO's 2035 Long Range Transportation Plan projected that the 2035 volume on Central Avenue (US 41 to Goodlette) will have a peak hour of 1,960 vehicles.

In 2002 a conceptual plan was developed for Central Avenue, a version of which was approved by the Community Redevelopment Board (CRA). This plan was never implemented and since 2002, additional development has occurred and future development is planned. These factors and how they impact Central Avenue will be addressed by this project.

The Central Avenue drainage issues appear to be a combination of undersized piping, inadequate number of inlets, and an overloaded low point. The consultant will evaluate existing conditions and design drainage improvements to achieve a level of service equal to 5-year 24-hour storm event (or capable of handling 6.6 inches of rainfall in a 24-hour period). This will require upsizing the mainline and extend it farther to the west to incorporate additional interceptor basins.

The City Utility department has identified the need to increase water supply pipe(s) along Central Avenue between 10th and 12 streets to service new development(s). The consultant will be required to design the placement of the new main into the ROW, but not model the line size.

PROJECT

A major public safety concern exists at the 9th street and Central Avenue intersection within the FL DOT right of way. Mitigating this concern will require cooperation between the strip mall owner, FL DOT and the City. In a prior conceptual plan, consensus was achieved on modifications to access and parking.

Other items of concerns along Central Avenue include:

1. Drainage
2. Lane requirements and alignment
3. Traffic signalization/movement at Goodlette/Central intersection
4. Parking along Central Avenue
5. Commercial business access (curbcuts, driveways, accessibility to sidewalk)
6. Alleyway access
7. Pedestrian and bike connectivity
8. Landscaping
9. Streetscape, including street lighting
10. Inconsistent street image with other City streets
11. Utility water line upgrade
12. Public utility upgrades and coordination

Challenges that exist along Central Avenue include:

1. Inconsistent street image
2. Varying width of Right of Way
3. Confusing intersections
4. Conflicting movements at major intersections
5. Haphazard on street parking along City Right-of-Way
6. Lack of pedestrian amenities
7. Access Management
8. Parking capacity in the ROW
9. Improving east/west connectivity through the City
10. Stormwater drainage

The following traffic impact studies have been undertaken:

1. 1075 Central – Naples Daily News site – October 23, 2013
2. Mangrove Bay – (LightHouse Point) – February 8, 2013
3. Review the City web site for information on capacity/circulation/LOS/etc.

SCOPE

The selected firm will be required to deliver the project in the multiple Phases. The major components of each phase are presented below.

Phase 1 – 30% Design

1. Present the 30% design and engineering reports to the Community Redevelopment Agency Advisory Board (CRAB) and City Council. The major components include:
 - a. Trip generation analysis for Baker Park with the connection to the Gordon River Greenway;

- b. Lane call/dimensions, signal timing for the corridor, warrant analysis (for 10th @ Central) with consideration to future traffic demands (all available TIS's and the Baker Park Trip Gen) and level of service;
 - c. Access, including curbcuts and driveways, median openings, alleyway connections
 - d. Pedestrian and bicycle facilities;
 - e. Street scape: parking orientation, number of parking spaces, landscaping, lighting, etc.
 - f. Stormwater management system;
 - g. Water main
 - h. Public utility considerations
2. Prepare an engineer's cost opinion associated with the construction of the project;
 3. Present to City Council and CRAA.
 4. Value Engineering Options: where cost is high or construction is difficult, the consultant should propose options for reducing cost, construction time, and construction challenges.

Phase 2 – 60% Design

1. Present the 60% design and specifications to the Community Redevelopment Agency Advisory Board (CRAB) and City Council.
2. Based on direction from City Staff and City Council, prepare revisions to the 60% design prior to submittal to permitting agencies.
3. Prepare and present a 60% engineer's cost estimate.
4. Prepare and submit all required permits applications and secure permits by the 100% Design submittal.

Phase 3 - 100% Design

1. Submit construction ready documents and all permits for bid. Documents should be signed and sealed by professionals of applicable disciplines.

Phase 4 - Bid Support

1. Provide support during the bidding process, including participation in pre-bid meeting and responding to bidders questions.
2. Review bids and make a recommendation of award.

Phase 5 – Construction Engineering Inspection (CEI)

1. Provide inspection at a level of support to be determined.

PROCESS

- Responses to this RFP will be received no later than July 9, 2014.
- A selection committee will be appointed by the City Manager. The selection committee will meet in the “sunshine” to discuss and rank the top three firms in order of preference based on written proposals.

- The City may choose to interview the highest ranked firms before a final ranking is established.

The final ranking by the selection committee may be completed in July 2014. Staff will then formalize a scope and negotiate a fee with the top ranked firm. If a fair and reasonable fee can be achieved, staff will present a contract with the number one ranked firm to the City Council on August 20, 2014.

WORK PHASES & SCOPE OF SERVICES

As the best interest of the City may require, the right is reserved to make award(s) by individual item, group of items, all or none or a combination thereof; to reject any and all proposals or waive any minor irregularity or technicality in proposals received.

The City intends close coordination with City Council and CRAA at the 30%, 60%, and 100% design phases and will require the selected firm(s) to diligently prepare for City Council meetings with City staff, clearly communicate at each meeting, and interactively work with City staff and City Council on options and ideas throughout the design process. The Naples City Council is comprised of extremely intelligent and experienced professionals who will ask highly educated questions. The City is seeking a design firm capable of enormous preparation for intense meetings. The design firm will be required to thoroughly address detailed questions with specific answers and referenced experiences.

The City expects multiple reviews of plans, engineering cost estimates, vendor information, etc. This will occur at the 30%, 60% and 100% plan design stages. The project schedule must reflect time for City staff to review and provide comment prior to submittal to City Council.

The City expects the selected firm to meet with FDOT at the outset to describe the issues the City concerns at the US 41-Central Avenue intersection as well as learn what future improvements DOT is planning within their Right of Way along US 41.

The City expects the selected firm to assist from design throughout the publicly advertised construction bidding process, including responding to requests for information and making a recommendation for a construction contractor.

The City expects the qualified firm to also be experienced and qualified in DOT construction engineering inspection, although this scope of work may or may not be developed as a subsequent phase to this design/engineering/permitting process.

PROJECT TIMELINE

It is the intent of the City, subject to the recommendations of the selected consultant, to issue a Notice to Proceed to the selected firm no later than August

24, 2014. It is also the intent that the project be under construction April 7, 2015. In responses to this RFP, the firm shall include a schedule (in sufficient detail) identifying the various components of this design. Include a discussion of the potential challenges and how you would propose to meet each challenge to insure that construction can proceed ASAP.
