In keeping with the requirement of the 2010 Florida Building Code, please provide the following when replacing HVAC equipment.

1) Building load calculations detailing the capacity of new system, BTU/HR. Residential.

2) Written certification from the contractor stating that the duct system (when in an attic) has been inspected and sealed where needed, Residential only.

3) Copy of AHRI or other efficiency rated of unit.

All three (3) documents shall be attached to the air handler or placed in the plastic bag containing the permit card. These documents will become part of the permit application. Failure to provide these documents will result in a failed inspection.
