Permit Application Number: _____

Job Address: _____

The Swimming Pool Safety Act requires that a barrier isolate any new or substantially remodeled swimming pool, spa, hot tub or water feature that has a water level that is more than 24" deep. This barrier may be horizontal (an approved safety cover) or vertical (a wall, fence, screen cage, raised deck or appropriate combination). If the vertical barrier is penetrated by a door, window or gate an alarm or self-closing device may also be required. Because of design variations more than one method may be required to isolate the water and should be so noted below.

I acknowledge that a new or renovated swimming pool, spa or hot tub or water feature will be installed and or renovated at the above address, and hereby affirm that one or more of the following methods shall be used to comply with the requirements of the current FBC, Section 454.2.17 (R-4501.17) and ANSI/ APSP-7 (R-4501.6.6).
