NOTES

This map is for use in determining the National Flood Insurance Program of the Federal Emergency Management Agency. It is not to be used for any other purpose. Areas of all areas subject to flooding, particularly those in the vicinity of small areas.

Areas of Special Flood Hazard, 100-year flood, include zones A, AE, AH, AO, A99, V, VE, and X.

Certain areas not in Special Flood Hazard Areas can be protected by flood control structures.

Boundaries of the floodways were computed at a cross section and interpolated between cross sections. The boundaries were based on hydraulic considerations with regard to representation of the Federal Emergency Management Agency Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway widths are shown at 1:25,000.

Coastal base flood elevations are based on the following:

- Elevation reference marks are identified in the Flood Insurance Study Report.
- Corporate limits shown are current as of the date of this map. The user should verify appropriate elevations, particularly in the case of corporate limits have changed subsequent to the issuance of this map.
- For additional details, see separate printed map books.
