The front cover photo is the Blair Foundation Bridge, opened February 20, 2018. The bridge connects the Gordon River Greenway to Baker Park, Central Avenue, downtown Naples and Naples Beach. Mayor Bill Barnett and the City Council are grateful to the Blair Foundation for their generous \$2 million donation toward developing the Blair Foundation Bridge which cost \$4.07 million to construct.

The bridge is 12' wide and has a total length of 820'. It has stainless steel cable railings that provide the best viewing of the surrounding river and mangroves. It is equipped with LED lighting and has a beautiful center pavilion.

TELEPHONE (239) 213-1030 • FACSIMILE (239) 213-1033 735 EIGHTH STREET SOUTH • NAPLES, FLORIDA 34102-6796

April 13, 2018

Honorable Mayor and City Council 735 Eighth Street South Naples, FL 34102

Mayor Barnett and Members of the City Council:

In accordance with Chapter 2, Section 691 of the Code of Ordinances, presented is the 2019-2023 Five-Year Capital Improvement Program. The five-year total is \$119.7 million for all funds, with the first-year totaling \$30 million.

This Capital Improvement Program (CIP) presents the proposed plan for major public improvements scheduled over the next five fiscal years. This CIP generally includes items with an expected life greater than two years and an expected cost greater than \$10,000.

The document is scheduled for review during Council Workshop on May 14, 2018. At that meeting, Department Directors will summarize projects with PowerPoint presentations. At that time, or at any time prior to the adoption of the Annual Budget in September, City Council may seek further information and amend, add, or delete projects or redirect priorities.

The CIP is a planning instrument that identifies and coordinates the financing and timing of public improvements. The first year of this five-year program will be considered for inclusion in the annual budget to be adopted in September of 2018.

This letter of transmittal will describe the purpose and methods used for the CIP. A complete list of projects is on the pages that follow. Details about each project, organized by fund, follow that list.

#### **DEVELOPMENT OF THE CAPITAL IMPROVEMENT PROGRAM**

The development of this CIP followed a method similar to prior years, with a continued focus on fiscal resources.

Each open project (that is, each project in the 2017-18 amended budget) was reviewed to determine if it would be under contract and encumbered at year-end, or if it should be resubmitted for continuation into 2018-19. If it is to be continued, a Capital Project Form was completed by the Department Director.

For each new project requiring funding for the 2018-19 fiscal year, each department prepared a Capital Project Form estimating the funding needed, justifying the project, and identifying any ongoing operating costs.

Projects requiring funding beyond the 2018-19 fiscal year were also considered and included. Forms were not required for FY 2019-20 and beyond, but cost estimates were added to the consolidated spreadsheet.

The development of the estimated costs varies based on the project. Many projects are considered "levels of effort", where the dollar amount is generally stable from year to year, but the projects may vary. For example, the "Alley Maintenance & Improvements" project is typically budgeted at \$75,000, and the Streets and Traffic department will spend those allocated funds based on priorities. Other projects have costs based on engineer's estimates, while others, such as the Police radios, have prices based on the current state contract. Some prices are based on recent acquisitions by other cities, or estimates provided by a manufacturer. For construction projects, the cost is typically an estimate only. More accurate estimates are generally provided after the design phase is initiated.

During this past budget year, Naples City Council has asked for additional clarity about how preliminary costs are developed, because several major projects, including Baker Park, Fire Station 1, and City Dock, have cost more than planned in the original capital improvement project. Several things affect the cost of a project, and this is more pronounced in government/public service than it is in private enterprise. Contributing factors include:

<u>Delays in projects</u>: Projects are planned 18-78 months ahead. Prices are less accurate when lead time is greater, as pricing indexes and resource availability changes. Due to the nature of public involvement and budget cycle, construction is much later than when the price estimate occurs.

<u>Projects are estimates</u>: Projects in the five-year plan may be listed as place holders, with price estimates identified before a scope of work/design is developed.

<u>Public Involvement</u>: After a project is publicized, it can gain civic interest as the community gets involved. A project that begins as one item can pick up momentum and public enhancements. For example, if a male/female restroom in a community park is included in the CIP and subsequently in the budget (with the price based on a similar construction nearby), community partners could request that the building include a concession stand, followed by a request for a kitchen. Thus, the restrooms could be modified to be responsive to community concerns or to match the style of the neighborhood. By vetting the project in public, desired enhancements are added to the project and the actual cost is greater that initially planned.

The Capital Improvement Program includes a 100-point rating system for projects, with the following for criteria: Image, Infrastructure, Health/public safety, External funding, Impact on operating budget, Green initiative, and Comprehensive plan compliance. The purpose of this rating is to demonstrate that projects meet the City's goals and objectives, and to show compliance with the comprehensive plan.

Ethics above all else ... Service to others before self ... Quality in all that we do.

#### **SOURCES OF FUNDING**

The following funds provide financial resources to fund the CIP, from earned revenue, donations, grants, retained earnings, or debt.

- Public Service Tax Fund
- Stormwater Fund
- Streets & Traffic Fund
- Building Permits Fund
- Solid Waste Fund
- Equipment Services Fund
- Technology Services Fund

- Community Development Block Grant
- Water & Sewer Fund
- Community Redevelopment Agency
- Beach Fund
- Tennis Fund

To assist in ensuring fiscal sustainability, this report includes preliminary revenue and operating expenditure estimates for the next five years for funds with capital projects planned. In enterprise funds/proprietary funds, the term "Working Capital" is used to represent available funds/retained earnings. Working Capital is the term used in the City's adopted fund balance policy, and represents current assets minus current liabilities, as defined in the comprehensive annual financial report. For other funds, the term "Fund Balance" is used.

Included in this document are capital projects funded by grants if the funding source is either confirmed or considered to be likely. For those items where the project is dependent upon grant receipt, it is so noted. If the grant is not received, the project will not be undertaken.

Several homeowners' associations have contacted the City for special assessments related to roads, canals and undergrounding of utilities. These will be brought to Council when the projects become more substantiated, and therefore not included in this CIP. One request, Seagate Undergrounding of Powerlines for \$1.4 million, is in the planning phases but has not yet received community approval via a straw poll of the property owners. Once that is achieved, the project will be subject to the establishment of a special assessment district by City Council.

#### BENEFITS OF THE CAPITAL IMPROVEMENT PROGRAM

Capital improvement programming links short- and long-range general plans with growth, public and private development, and the annual budgetary process. In this way, the CIP attempts to achieve the goals and objectives of City's residents, citizen boards and commissions, and City Council.

The CIP carries the following primary benefits:

- Focuses attention on Citywide priorities and citizen expectations
- Fosters inter-departmental coordination of City infrastructure investments
- Provides a concrete implementation framework for the Comprehensive Plan and Vision Plan
- Promotes accountability for the long-term planning and investment of public funds.

Ethics above all else ... Service to others before self ... Quality in all that we do.

#### **MAJOR PROJECTS**

The primary focus areas of this five-year CIP continue to follow the goals of the City's Comprehensive and Vision Plans.

The dominating fund of this year's CIP is the Water Sewer fund, with over 55% of projected spending occurring in this fund.

Although the construction and development of Baker Park is now fully funded and underway, other parks and park facilities are expected to be a dominating project area over the next few years. Many parks are in need of upgrading and enhancements to address either an aging facility or a changing community.

#### ABOUT THIS DOCUMENT

Immediately following this letter of transmittal is a complete list of planned projects, sorted by fund, for five years. That summary provides the best overview of the projects planned.

The remainder of this document is separated by fund or fund type. Behind each tab is a narrative (if applicable) and a spreadsheet listing the projects in that fund and noting the funding availability. Following that list is a detailed project sheet for each project proposed for the first year of the CIP.

After publication and presentation to City Council in May, the City of Naples Capital Improvement Program becomes a final document. It is neither adopted nor amended. As a plan, it is designed to be a set of recommendations for the future. Adoption of the FY 2018-19 budget will include the City's Capital Improvement Program for that fiscal year. Inclusion in this CIP does not guarantee that a project will have funding either now or in the future.

#### CONCLUSION

Implementation of the CIP is contingent upon the availability of funding sources and adoption of the annual budget in September.

At the May City Council Workshop, the Five-Year Capital Improvement Program will be reviewed. At that time, capital priorities can be further established to assist in the preparation of the FY 2018-19 budget. If supplemental information is required before that meeting, please contact me and the information will be compiled and properly distributed.

Thank you for your guidance in this important process.

Respectfully submitted,

A. William Moss City Manager

Ethics above all else ... Service to others before self ... Quality in all that we do.

#### **CAPITAL IMPROVEMENTS PROGRAM**

#### PUBLIC SERVICE TAX / CAPITAL IMPROVEMENT FUND

The Public Service Tax/Capital Improvement Fund is one of the largest sources of capital financing for the City of Naples.

Florida Statute sections 166 and 202 authorize municipalities to collect Public Service Taxes. City Code Section 34 Article IV governs the collection and appropriation of Naples' public service tax receipts. City Code states that public service tax receipts shall first be appropriated for any debt service on outstanding obligations backed by these receipts. After that, funds are to be transferred to the capital improvement fund of the City for the uses and purposes set forth and contained in the budget for the current fiscal year. This fund represents the latter purpose.

#### **Major Projects**

The items listed for the Public Service Tax Fund for FY18-19 total \$3.28 million. There are four areas typically funded by the Public Service Tax.

#### **Administrative Departments**

Typically, administrative departments such as Finance, City Manager, Planning or City Clerk do not have significant capital needs. For FY18-19 the City Manager's Department is requesting \$24,000 for the purchase of a vehicle for the new Code Enforcement Officer.

#### **Police Department**

The Police Department's 2018-19 capital requests total \$452,400. Generally, Police Department capital requests include replacement of equipment and this year is no exception. Among the several replacements: portable radios (\$71,000), four marked vehicles (\$230,400), two unmarked vehicles (\$70,000), 21 tasers (\$30,000) and 37 in-car AVL's (\$31,000) are requested. The only new item requested is a Special Event Vehicle (\$20,000) to enable police response for both on and off-road special events.

#### **Fire - Rescue Department**

The 2018-19 requests for the Fire Department total \$270,000. These requests include: new equipment for the Emergency Operations Center (EOC) \$175,000, Opticom Multimode Emitters for all fire apparatus (\$50,000) and Hydraulic Extrication Equipment (\$45,000).

#### **Community Services Department**

The Community Services Department's 2018-19 requests total \$2,537,685.

Community Services includes Facilities and Grounds Maintenance of the City, as well as Parks and Recreation. The CIP summary request page is broken down into 3 categories: Landscaping/Parks & Parkways, Recreation Facilities, and City Facilities.

All replacement vehicles for the Community Services five-year plan have been projected based on the Equipment Services 15-point replacement criteria. One additional vehicle for \$200,0000 is intended to replace the current clam truck which has been a struggle to maintain. However, because of its use after storm events the current clam truck will not be retired.

#### **Impact Fees**

As a revenue source, Impact Fees are tracked in separate funds, which are not budgeted until the funds are needed. In accordance with state law Impact Fees may only be used to provide increased capacity for the fire, police, and parks and recreation operations to accommodate any increased demand new development will have on existing operations. For FY 18-19, the use of impact fees is not proposed, but are recommended to be reserved for expanded capacity projects in the future.

The March 2018 cash balances of the Impact Fee Funds are as follows:

Fire \$237,081 Police \$39,166 Recreation \$103,531

There are several other unbudgeted funds which can be used for capital improvements. The current cash balances are:

Public Art Fund \$663,700
Parking Trust Fund \$1,300,000
Land Trust Fund \$7,700
41-10 Public Open Space Fund \$163,000

#### **Summary**

The 2019-23 Capital Improvement Program of the Public Service Tax Fund is outlined on the following pages. Projects tentatively planned for 2018-19 are displayed with data sheets that provide details of the project, the justification for the project, and related information. Projects for Fiscal Years 2019-20 and beyond do not include capital project sheets in this document.

# CAPITAL IMPROVEMENTS PROGRAM WATER SEWER FUND

The projects scheduled for the next five years for the Water Sewer Fund (Fund 420) are identified on the following pages. Departmental requests planned to begin in Fiscal Year 2018-19 are presented on individual project sheets with cost details. Projects for Fiscal Years 2019-20 and beyond do not have capital project sheets.

Projects in the Water Sewer Fund are funded primarily by the rates paid by water, sewer and irrigation customers. Retained earnings, impact fees, grants and special assessments are other sources of revenue for water and sewer projects. The first year of the FY 2018-19 CIP is \$15.9 million and the five-year request total is \$57.5 million.

City Council adopted the Integrated Water Resources Plan on October 1, 2008, to provide a sustainable water supply source for a 20-year planning period. Upon adoption of the plan, City Council provided strategic direction for the development of future water supply and storage facilities to include aquifer storage and recovery (ASR), use of water from the Golden Gate Canal supplemented by available stormwater, and, if ultimately deemed necessary, the development of brackish groundwater wells with treatment by a new reverse osmosis water treatment plant. An ASR Wellfield has been developed on Riverside Circle that consists of four ASR wells with the fourth well being constructed and completed in 2016. The ASR wells are used to store excess plant effluent and water from the Golden Gate Canal during the wet season to supplement the reclaimed water system during the dry season.

On February 19, 2014, City Council provided direction to proceed with a plan to expand the reclaimed water system in Zones 1-4 identified in the 2013 Preliminary Engineering Report allocating \$3.0 million per year for three years. The three-year expansion plan authorized by City Council in 2014 was completed in 2017.

On March 19, 2018, staff provided City Council an update to the five-year Reclaimed Water Expansion Plan and included an update as to the sustainability of the current Water and Sewer rates.

The proposed five-year Reclaimed Water Expansion Plan includes an option to blend water from the city's well system with the reclaimed system. The proposed connection will link the raw water transmission line located on Golden Gate Parkway to the transmission line that conveys water from the Golden Gate Canal to the reclaimed water plant on Riverside Circle. This interconnect is intended to supply the reclaimed water system with up to 3 million gallons per day during extended drought periods when the Golden Gate Canal is not available, and when the ASR wells cannot provide stored water due Chloride levels. The engineer's estimate is \$1.2 million to permit and construct this main with construction being completed by next year. City Council provided direction to pursue constructing the raw water interconnect to increase the supplemental water supply prior to implementing the five-year reclaimed water expansion plan.

The five-year Reclaimed Water Expansion Plan also provided an update to the potable water demands in the 12 zones within the City limits. The highest potable water irrigation demand continues to exist in Zones 1 and 4 and focuses on reclaimed expansion within those zones. This area represents a potential reduction in potable water irrigation by approximately 650,000 gallons per day. The engineer's estimate of construction cost is between \$14,322,000 and \$19,096,000

over the five-year period. This equates to roughly \$3.0 million per year, the same as the previous three-year expansion plan. As a result of the update, City Council authorized staff to develop a five-year capital improvement program for the expansion plan; \$18.0 million has been included within the FY 2019-23 five-year Capital Improvement Plan.

The rate study update indicated that revenue produced by the current rates and projected annual CPI adjustment is sufficient to sustain \$3.5 million per year of reclaimed water distribution system expansion in Zones 1 and 4 from FY 2019 to FY 2023.

During FY 2017-18, the City and County intends to award a joint construction contract for the installation of a City sanitary sewer system in conjunction with Collier County stormwater improvements within Areas 4 and 5 of the City's Master Sewer Plan for the City's Unsewered Service Areas. This project is pursuant to an Interlocal Agreement approved by City Council on November 2, 2016. The five-year CIP plan includes an increase of \$1.5 million for FY 2018-19 for water distribution system improvements. This increase will account for water main upgrades, hydrant installations, and service line replacements that are included with the joint sanitary sewer and stormwater system improvements in Areas 4 and 5. Water distribution system improvements are proposed to address aging infrastructure and enhance fire protection.

The other projects listed in this section relate to replacements needed to maintain existing service and infrastructure.

## CAPITAL IMPROVEMENTS PROGRAM BUILDING PERMIT FUND

The Building Permit Fund is a Special Revenue Fund, supported by building and permit fees. This Fund is used to account for activities related to construction code compliance within the City.

State of Florida records' retention requirements obligate the City to retain certain non-single family residential building plans as permanent records. To achieve this, the Building Department will purchase space (previously allocated during construction) located in new Fire Station #1 to provide more secure building permit records storage. The \$350,000 budget will include a reimbursement to the Public Service Tax Fund of \$300,000 for the storage area's construction and \$50,000 for purchase and installation of the filing system.

Building renovation work will continue from the previous fiscal years. In FY18-19, the existing metal roofing will be replaced as recommended by a roof evaluation report (\$500,000). The City has applied for a FEMA mitigation grant and is expecting to receive \$400,000. Net cost to the City would be \$100,000. If the mitigation grant is not approved, the department will allocate \$100,000 on roof improvements to ensure the building stays secure.

By the end of FY19-20 the vehicle replacement program that began in FY14-15 will be completed. In FY18-19 and 19-20, one Ford Escape is earmarked to be replaced each year (\$30,000/year).

Computers currently in use are incapable of providing electronic plan review. At a cost of \$100,000, new computer systems with 28" LCD monitor touchscreens will provide building inspectors and plans reviewers the ability to use the Blue Beam electronic software plan, including the ability to allow handwritten markups on submitted permit documents.

# BUILDING FUND - FUND 110 FINANCIAL ESTIMATES FOR CAPITAL PROJECTS Fiscal Year 2019-2023

	Amended Budget 2017-18	Budget Projected 2018-19	2019-20	2020-21	2021-22	2022-23

#### **CAPITAL IMPROVEMENTS PROGRAM**

#### **Community Redevelopment Agency (CRA)**

#### **The CRA Planning Process**

The original Community Redevelopment Plan was approved by the Naples City Council on May 18, 1994 pursuant to Resolution 94-7202. Over the ensuing years various capital improvements were completed including construction of Sugden Plaza, the public parking garage on 4<sup>th</sup> Avenue South, and 10<sup>th</sup> Street improvements.

On November 5, 2008, a Plan update was presented to the Community Redevelopment Agency Board. The update integrated 13 plans and studies developed over time. A key part of the CRA Plan Update was a Vision Plan of future capital improvements for the remainder of the CRA term, which was scheduled to sunset in 2024. The total estimated cost of the improvements in the Vision Plan was \$50.2 million.

The Great Recession began in late 2008 and included several years of declining property values in the redevelopment area. The March 21, 2012, CRA Sustainability Report included a list of prioritized projects contained in the 5-year capital improvement plan estimated to cost over \$10 million. The report estimated through the 2024 sunset date of the CRA approximately \$2.6 million in tax incremental financing would be available to fund the prioritized capital projects, a shortfall of \$7.4 million based on the assumptions used in the report.

Following the sustainability discussion, consideration of extending the sunset date of the CRA to provide increment revenue to fund redevelopment initiatives commenced. On January 15, 2014, City Council approved Resolution 14-13401 adopting the amended and modified Naples Community Redevelopment Agency Redevelopment Plan. That Plan extended the CRA sunset date, providing a time certain for completing all redevelopment financed by increment revenue (September 30, 2044). Included in the Plan is a workable program for using public resources to fund redevelopment initiatives, a broad vision of redevelopment initiatives, and redevelopment goals, objectives, policies, strategies, and increment revenue projections to implement the plan.

On September 2, 2015, the CRA Board considered the FY2015-16 budget of the CRA. The Capital Improvement Plan (CIP) approved included projects to improve connectivity, including Central Avenue, 1<sup>st</sup> Avenue South, 3<sup>rd</sup> Avenue South, 5<sup>th</sup> Avenue North, and 8<sup>th</sup> Street South. Scheduled maintenance to the 6<sup>th</sup> Avenue South parking garage, and construction of a Wayfinding program were included for planning and budgeting purposes, although funding was planned in the operating budget.

The Central Avenue Improvement project (8<sup>th</sup> Street to Goodlette-Frank Road) began in April 2016, with the corridor reopened to traffic in November 2016. This project was a collaborative effort to include stormwater improvements, utility upgrades, streetscape and bicycle and pedestrian enhancements. Two roundabout intersections were installed, one at 8th Street and one at 10th Street to increase efficiency, reduce maintenance costs associated with traffic signals, and increase safety.

On August 17, 2016, the CRA Board considered the FY2016-17 budget of the CRA. The Board agreed to a \$1 million transfer from the CRA Fund to the Baker Park Fund, and to continue the projects approved in 2015, with a change in the scheduled order of the projects. The Board

allocated \$150,000 for unspecified improvements in the River Park neighborhood of the redevelopment area, directed staff to obtain an appraisal for the parking lot property located at 4<sup>th</sup> Avenue South and 4<sup>th</sup> Street and to have discussions with the property owner regarding a potential purchase of the property.

During the summer of 2017 the construction of improvements in the 900 block of 3<sup>rd</sup> Avenue South began, including a roundabout intersection at 10<sup>th</sup> Street and 3<sup>rd</sup> Avenue South. Construction was completed and the roadway opened to the public in November 2017.

The approved 2017-18 CIP was a continuation of earlier approved projects with a modification to eliminate implementation of the Wayfinding program. Funding was never appropriated for the purchase of the 4<sup>th</sup> and 4<sup>th</sup> parking lot property and attempts to acquire that property were ended. In the approved CIP, the budget for 8<sup>th</sup> Street improvements increased and the scope of the project was modified to include construction of (1) a roundabout intersection at 8th Street and 3rd Avenue South and (2) construction of 3rd Avenue South from 9th Street to 8th Street for the purpose of completing the planned improvements on 3rd Avenue South from 10th Street to 8th Street. (The conceptual design of 3<sup>rd</sup> Avenue South and the intersection at 8<sup>th</sup> Street and 3rd Avenue South, including a roundabout feature, was approved on December 21, 2016.)

In late 2017, planning for the preparation of FY2019-23 CIP was initiated. As no capital projects were identified beyond FY2019-20, a process was initiated to identify and prioritize the appropriate projects to be included in the CIP for planning and budgeting purposes. In a letter dated December 8, 2017, Gulfshore Playhouse proposed a partnership to construct a new parking structure adjacent to their proposed new theater at 1st Avenue South and Goodlette-Frank Road to provide parking for patrons as well as for the public. As part of the partnership, Gulfshore Playhouse indicated they were willing to donate the land for the garage and provide certain project management services. Two special CRA Town Hall Meetings were held, the first on Thursday, February 8, 2018 at 6:30 PM at River Park Community Center, and the second on February 20, 2018 at 2:00 PM at Naples City Council Chamber. These community brainstorming meetings provided participants the opportunity to prioritize suggestions through a process christened "Dotmocracy". Three themes were consistently voiced in the Town Hall meetings: (1) stormwater improvements; (2) connectivity; (3) beautification. The projects recommended for funding in the proposed capital plan address these concerns.

At the March 21, 2018, CRA meeting, a motion to approve the concept design for 8th Street improvements failed. On March 26, 2018, the Advisory Board approved a motion recommending the CRA consider a reduced project on 8th Street South from Central Avenue to 5th Avenue South. On April 18, 2018, the CRA Board met to consider the recommendation of the Advisory Board and authorized proceeding with the original 8th Street project to the 60% design phase. Funding for construction of the 8th Street project is therefore included in the proposed capital plan.

On April 23, 2018, the Advisory Board recommended approval of the proposed capital plan including continued discussion about the potential parking garage partnership. The Advisory Board also recommended including an unfunded line item for 10<sup>th</sup> Street corridor improvements. Addition of the 10<sup>th</sup> Street corridor is not recommended at this time as the street was improved in 2004 (Central to 5<sup>th</sup> Avenue South) and 2007 (Central to 7<sup>th</sup> Avenue North) and no specific projects have been identified. Staff will continue to work with the Advisory Board to identify specific projects for this corridor, including maintenance items that may be funded in the operating budget.

Descriptions of future projects are:

#### 5th Avenue North Interconnect.

This project includes a plan to allow east – west travel across US41 controlled by a traffic signal interconnected with the existing 4th Avenue North traffic signal. This project may not change north – south travel time and would increase connectivity from Goodlette-Frank Road to 8th Street South, providing another east – west travel corridor and potentially reducing demand on 7th Avenue North. May be considered in conjunction with US41 intersection improvements.

#### 1st Avenue South Improvements.

This project includes funding for "Complete Street" improvements to this corridor. The design is not predetermined, the vision, in conjunction with the Central Avenue improvements and the 8<sup>th</sup> Street improvements, is to create a sense of place in the Heart of Naples. The vision may include the possibility of allowing east – west travel across US41 and Goodlette-Frank Road controlled by traffic signals interconnected with the existing Central Avenue traffic signals, not impacting north – south travel time, increasing east-west connectivity, and providing another travel corridor to enhance the transportation grid. Along with private investment anticipated along the corridor (Summit Building, The Collective, Gulfshore Playhouse) these improvements could be a catalyst to development of the vacant lots between 10<sup>th</sup> and 12<sup>th</sup> Streets. Due to the increases in construction costs being experienced throughout the area, consideration for increasing the CRA portion of the funding of the 1st Avenue South project from \$2 million to \$4 million is recommended.

#### **Public Parking Garage Partnership**

It is recommended that staff continue discussions with Gulfshore Playhouse to ascertain details and costs of a proposed public parking garage partnership, confirm the location is appropriate, and include the project as an unfunded "placeholder" in the five-year capital plan.

In the event a partnership with Gulfshore Playhouse is further explored, timing of construction of the Playhouse campus, parking garage, and improvements to 1<sup>st</sup> Avenue South should be discussed as there may be advantages to construct the structures prior to the roadway improvements, altering the proposed capital project schedule.

If the proposed capital plan is approved, it is conservatively estimated that an additional \$4.9 million of tax increment revenue will be available for additional capital projects through FY2023. Beyond increment revenue there is an additional \$1.4 million in the CRA parking funds (5<sup>th</sup> Avenue and D-Downtown) that could be utilized for certain payments potentially increasing the amount available for capital projects to. \$6.3 million. The increment revenue estimate increases to about \$5.9 million utilizing less conservative projections, totaling \$7.3 million when utilizing the parking funds. (Receipt of an additional \$166,000 in the D-Downtown parking fund is pending payment at building permit issuance for two recently approved parking allocations.)

The CRA has limited ability to "save up" its funds due to the provisions of Section 163.387(7), Florida Statutes. Essentially, the CRA cannot continue to hold money without allocating it to a specific project. This section requires that funds remaining in the Redevelopment Trust Fund on the last day of the fiscal year shall be:

a) Returned to each taxing authority which paid the increment in the proportion that the amount of the payment of such taxing authority bears to the total amount paid into the trust fund by all taxing authorities for that year;

- b) Used to reduce the amount of any indebtedness to which increment revenues are pledged;
- c) Deposited into an escrow account for the purpose of later reducing any indebtedness to which increment revenues are pledged; or
- d) Appropriated to a specific redevelopment project pursuant to an approved community redevelopment plan which project will be completed within 3 years from the date of such appropriation.

## APLE ON THE GULF

## CAPITAL IMPROVEMENTS PROGRAM STREETS & TRAFFIC FUND

#### Overview

The Streets fund is responsible for maintaining and improving all City streets, pathways, intersections, street markings, decorative street lights, sidewalks, traffic signs and signalization. The fund also supports operational responsibilities for energizing street lights, reviewing traffic impacts from proposed development plans, administering right-of-way and franchise permitting, and processing easement, platting and vacation requests. The primary funding sources for capital projects are gas taxes. Other minor revenue sources include funding from an interlocal agreement with Collier County related to collection of impact fees, agreements with FDOT related to traffic signal and street light operations on US41, right-of-way permitting fees, and the State Revenue Sharing program.

In FY17-18 the Division completed the Arterial Pavement Resurfacing Program that allocated an extra \$1 million to the resurfacing program dedicated to arterial streets over the last four years. In FY18-19, the Division continues to focus on citywide resurfacing efforts. The source of funding for the ADA Accessibility Project is the revenue generated from the \$250 handicap fines collected in accordance with City Code Chapter 36-61. For FY 18-19, \$15,000 will be transferred from the handicap fine reserve account.

#### 2018-19 Capital Discussion

As local economic conditions continue to show signs of growth, the Streets & Traffic Division continues to coordinate with the CRA, other city departments, and private developers to find ways to preserve, maintain, and improve pavement conditions and infrastructure within the City's rights-of-way. Additional ways the Department produces results is through its coordination with the Florida Department of Transportation (FDOT) and the Metropolitan Planning Organization (MPO). FDOT funded projects are clearly detailed on the CIP list of projects over the next five years. Finally, the Department has successfully worked through Community Development Block Grant processes to improve transportation infrastructure within the City's low-income areas.

The Department works extensively with public and private utility companies, as well as private developers, to understand the timing of planned infrastructure improvements. This effort is needed to minimize repeated impacts within the right-of-way and to prevent damage to new pavements. An example of this coordination relates to the Utilities Department installation of the reclaimed water transmission main under many collector streets. The Department recognizes planned infrastructure improvements by the Utilities Department, as well as private utility companies and home builders and is scheduling street resurfacing to follow the most disruptive activities.

Capital projects within the Streets & Traffic Division of the Department include:

#### Pavement Resurfacing Program (\$600,000)

Each year staff identifies street resurfacing locations based on objective pavement rating criteria, as well as input from property owner associations. Pavement maintenance may include crack sealing, milling, overlays and full reclamation. Where pavement maintenance requires drainage

pipe repairs, inlets, curbing and swale work, additional funding is obtained from the Stormwater Enterprise Fund for that specific drainage improvement or repair. This program is budgeted in the operations budget and identified in the CIP list for information only.

#### 19U31 Alley Maintenance & Improvements (\$75,000)

Although not as heavily used as roadways, alleyways are critically important for property access. Alleys are used by general traffic, utility companies, and trash collection vehicles causing wear and tear. This program allows staff to maintain and improve alleyways. It also considers neighborhood requests to have alley surface changes (i.e. limerock to asphalt) based upon budget and adjacent property owner support. A petition process assures that the majority of adjacent residents approve the change.

#### 19U07 City Road Bridge Improvements - Harbour Drive (\$175,000)

In 2017 and as part of a bi-annual bridge inspection program, FDOT identified major and minor issues associated with all four City-owned bridges. This CIP allocates funding towards bridges over the next 4-years in priority order. This year, the Harbour Drive Bridge over Moorings Bay was identified as the first bridge for improvements. Improvements include repairing undermining of the abutment caps, backfilling large void spaces by the west bulkhead, repairing spalling, and delamination in the bulkhead piles. In future years, the Park Shore, Mooring Line and Galleon bridges are programmed.

#### 19U21 Americans with Disabilities Act (ADA) Accessibility Improvements (\$15,000)

This CIP allows the Department to achieve a higher level of compliance with the requirements of the Americans with Disabilities Act (ADA) where existing infrastructure is known to challenge the disabled. The Department will address non-compliant curb ramps for wheel chairs and strollers, truncated domes for the visually impaired, pedestals for pedestrian activation of signals, and other ADA compliant devices. The objective is to resolve ADA accessibility issues throughout the City's rights-of-way in accordance with the City's approved ADA Transition Plan.

#### 19U29 Pedestrian & Bicycle Master Plan Projects (\$150,000)

In 2013, City Council adopted an update of the City's Pedestrian and Bicycle Master Plan. Progress towards the City's Master Plan occurs within multiple CIP's, and the Department continuously strives to coordinate with the MPO, FDOT, private developers, and public utility companies as well. Over the next two years, the allocation of funding continues to be consistent with the priorities identified in the Master Plan: sidewalk, bike lane, and crosswalk upgrades and improvements. The Department is also planning on an update to the Master Plan.

#### 19U01 Intersection Improvements (\$400,000)

For several years, the Department has been upgrading signalized intersections that rely on cable wire to support traffic signals. FDOT guidance requires signalized intersections within 10-miles of the coastline to be supported by a mast-arm support system to achieve safety and performance standards associated with high wind events. Prior to moving forward with a project that would install large, rigid, industrial infrastructure to support a signalized intersection, the Department is reviewing alternative intersection applications such as a roundabout. Roundabouts provide several advantages over signalized intersection, including safety, more efficient traffic flow (achieving a higher level of service from a capacity standpoint), reduced delay, calming speeds, and aesthetics. FY 17-18 allocated \$75,000 towards design of a roundabout at Crayton Road and Harbour Drive, which includes an extensive community involvement program. This effort will conclude in the summer of 2018. FY 18-19 allocates \$400,000 in funding for construction. In the out-years, the remaining four span-wire intersections to be addressed, in priority order, are:

Crayton Road at Mooring Line Drive; 9th Street South at 10th Avenue South; 8th Street South at Broad Avenue South; and Fleischmann Boulevard at 10th Street North.

#### 19U08 Traffic Operations & Signal System Improvements (\$70,000)

The FDOT recently provided us with 20 new and advanced traffic controllers at a cost of \$60,000 to FDOT. However, the Department is currently unable to deploy the controllers out in the field because we do not have the correct/compatible software to operate the controllers. The (ATMS) software would allow the City to communicate to the new controllers in real time and help the City manage and improve the flow of vehicle traffic.

#### 19U04 Vehicle Replacement (\$70,000)

The Sign/Signal Technician vehicle in the Streets and Traffic Division has reached the end of its useful life. The existing vehicle (Equipment ID# 12F970) was originally purchased in 2008. The cab of the truck had to be replaced in 2009 due to an accident totaling the cab of the truck. The vehicle is used primarily to replace and maintain signs, conduct locates, install traffic counters, inspect and repair sidewalk, alley/pothole, roadway, and other damages. The vehicle is also used to tow trailers with equipment such as generators and pressure washer. According to Equipment Services' records, the vehicle has generated 16.6 points out of a 15-point replacement/maintenance criterion and therefore no longer economical to maintain. The vehicle is scheduled to be replaced with a F450 with cab, chassis, and fabricated Crane Master Service Body as recommended by Equipment Services for vehicle fleet maintenance consistency.

#### 19U09 Downtown Transportation Plan Improvements (\$400,000)

It is expected that the City will adopt a Downtown Mobility & Connectivity Plan in 2018 that demonstrates through modeling, projections and conceptual design, that improvements can be made to roads and intersections that improve safety, traffic flow and roadway capacity, pedestrian and bicycle facilities, transit, and ride sharing. Early priorities of the plan include intersection improvements at Goodlette-Frank Road and US-41, Four Corners, roundabout construction at 5<sup>th</sup> Avenue North and 10<sup>th</sup> Street and at 8<sup>th</sup> Street South and 3<sup>rd</sup> Avenue South, signal timing system improvements, turn lane construction at the busiest intersections along US-41, and lengthening median turn lanes at critical locations along US-41.

Staff recommends that the allocation of funding for this CIP item is contingent upon two opportunities:

- 1. Increased retainage of locally generated transportation impact fees: Collier County staff has indicated the possibility of increasing the retainage amount of impact fees collected by the City from City projects if the City can show that the use of impact fees will be specifically for increasing roadway capacity for motorized vehicles. At this time the impact fee retainage amount is capped at \$200,000 per year. In FY16-17, the City collected \$670,732 in transportation impacts fees. \$200,000 was retained by the City and \$470,732 was sent to Collier County to use outside the City.
- 2. <u>FDOT commitment of funding for US-41 improvements</u>: FDOT is the responsible agency charged with managing US-41. As FDOT prepares to rebuild the stormwater management system along US-41, the City has a unique opportunity to participate in reconstruction efforts in such a way as to implement changes identified in the Downtown Circulation and Mobility Plan. Such changes include widened and buffered sidewalks, landscaping and hardscaping enhancements, turn lane reconfiguration, and intersection improvements.
- 3. CRA commitment of funding

## 19U10 Gulf Shore Boulevard North seawall & parking restoration (\$500,000)

There is currently a public sidewalk and parking lot located along a concrete seawall shoreline on Gulf Shore Boulevard North. The seawall has deteriorated and caused a segment of the sidewalk to collapse and other areas of sidewalk and parking area to settle significantly. This CIP allocates funding towards a project that would restore damage and at-risk sidewalk and parking area to a location away from the failing seawall.

#### 19U11 Lantern Lane Road Widening (\$85,000)

The Port Royal Association has indicated a strong interest in developing a special assessment for property owners along Lantern Lane to widen the road from 19-feet, 6-inches to approximately 22-feet, 6-inches. This road widening project would provide better protection of landscaped areas, improved stormwater drainage (quantity only), and improve road capacity in that parked vehicles currently impair the flow of traffic. The allocation of this funding is contingent upon the shared cost approach and the successful development of a special assessment to property owners.

## STREETS AND TRAFFIC FUND - FUND 190 FINANCIAL ESTIMATES FOR CAPITAL PROJECTS

Fiscal Year 2019-23

FUND: 190 Streets & Traffic Fund

PROJECT NAME: Alley Maintenance & Improvements

65 Streets

**DEPARTMENT:** 

PROJECT TYPE: Ongoing Maint. VISION PLAN: Preserve Character/Culture	K:2
PROJECT DESCRIPTION/LOCATION:	
Citywide alley maintenance, repairs, and improvements to public alleyways. Also includes alley retrofits a City's petition process that allows an alley to be upgraded to asphalt paving via approval of a majority of a owners.	
JUSTIFICATION: For replacement vehicles, current vehicle make/model/ year, mileage/hours and price maintenance costs must be included.	r year
Although not as heavily used as roadways, alleyways are critically important for property access. Alleys are traffic, utility companies, and trash collection vehicles causing wear and tear. This program allows staff improve alleyways. It also considers neighborhood requests to have alley surface changes (i.e. limerock to upon budget and adjacent property owner support. A petition process assures that the majority of adaptive the change.	to maintain and asphalt) based

## CAPITAL IMPROVEMENTS PROGRAM SOLID WASTE FUND

The Solid Waste fund is an Enterprise Fund, funded primarily with solid waste fees for residential, multi-family and commercial collections. The fund is used to account for the activities related to proper operation and management of the City's solid waste collection and disposal.

#### 2018-19 Capital Discussion

The Solid Waste Division services approximately 7,700 residences (single family, duplexes, and triplexes) and 9,000 Multi-Family units (complexes with four or more units). Commercial waste is collected from approximately 650 commercial customers and 500 condominiums. Small satellite collection vehicles with dump bodies are used for the side-yard residential collection service provided by the City. The small satellite vehicles haul the collected waste to the large refuse trucks that transfer and dispose of the garbage at the Collier County landfill. The department has 9 small trucks and 16 large trucks that perform residential, commercial and recycle collection services.

Ongoing capital requirements for the Solid Waste Division primarily include the replacement of vehicles that meet Equipment Services replacement criteria based on mileage, age, and maintenance costs. These vehicles are no longer able to be restored via the City's rebuild program. Additionally, due to the extensive wear, idle time, and constant operation on these types of vehicles, they are scheduled to be replaced every five (5) to eight (8) years. The FY 2019 budget includes the replacement of one small satellite collection vehicle and one large rear loading refuse truck used for collecting recyclable materials. FY 2020 through FY 2023 is projected to replace one small satellite collection vehicle (\$32,000) and one large refuse truck (\$270,000) per year.

The Solid Waste fleet also includes two large grapple trucks that are used for collecting bulk material. Bulk material is collected from both residential and commercial customers. Staff is proposing to purchase two additional grapple trucks over the next two years (\$200,000 each) to assist with bulk collection routes and provide additional resources for emergency events that may require debris removal. Future years within the 5-year plan will also account for the replacement of the existing two grapple trucks currently being used for collections.

Since FY 2010-11, the department has been rebuilding both small and large solid waste vehicles, thereby extending the useful life of each vehicle by two to four years. Vehicle rebuilds typically include refurbishment of the truck bodies and replacement of hydraulic hoses and cylinders. The cost of a new large truck is \$270,000 compared to the rebuild cost of \$35,000 - \$50,000 per truck. The FY 2019-2023 CIP plan includes \$100,000 per year to account for solid waste vehicle rebuilds.

## CAPITAL IMPROVEMENTS PROGRAM STORMWATER FUND

#### Overview

The City's Stormwater fund is responsible for maintaining and improving the City's stormwater management system which includes storm drainage, flood protection, and water quality infrastructure and programs. This fund is operated as an enterprise fund, where users pay a fee. The fee for a typical homeowner is \$13.35 per month, or \$26.70 per bi-monthly bill. City code allows the fee to change every October by the Consumer Price Index.

#### 2018-19 Capital Discussion

The 2018-19 capital project list for the Stormwater fund is \$2,943,000. The following highlights the major projects planned.

#### 19V02 Citywide Stormwater Drainage Improvements (\$700,000)

The purpose of this ongoing, annual project is to protect both private and public property from adverse high-water conditions caused by storm events of various magnitudes. Capital work under this program may include the investigation and repair of major and minor storm sewers, drainage inlets and manholes, control structures, pump station hardware, discharge/outfall structures, culverts, concrete and grass swales, and related drainage facilities on an ongoing annual basis. Appropriate levels of replacement and/or construction of new supplemental drainage facilities are critical to maintaining desired or prescribed stormwater levels of service. Such work is typically performed by contractors under annual service contracts with the most competitive pricing and most qualified staff. In addition, this project will fund ongoing GIS data acquisition and mapping for all basins as required by the City's NPDES permit.

#### 19V15 Naples Bay Water Quality Improvement at the Cove Pump Station (\$1,000,000)

The Cove Stormwater Pump Station is located on Broad Avenue South and is the central point of drainage for a 440-acre drainage area of residential and commercial property in Old Naples. The station discharges approximately ½ billion gallons per rainy season. Decades of discharge have caused sediment to accumulate at the outfall in Naples Bay. This project will remove accumulated sediment and construct a living shoreline in Naples Bay. In FY15-16, City Council approved the final design and permitting phase for this project. This CIP includes construction in FY18-19 at \$925,000, which is \$75,000 less than the allocation requested last fiscal year. This is due to the City successfully acquiring a \$75,000 grant from the South Florida Water Management District. This project is being carried forward one year because the U.S. Army Corp has yet to issue a permit for this project; national disasters, including hurricane Irma, have set back Corps permitting at least a year.

#### 19V12 Oyster Reef & Seagrass Restoration Project (\$100,000)

In FY 14-15, staff began designing and permitting a project to allow the City to create approximately 15 acres of oyster beds and 1-2 acres of seagrass beds in Naples Bay. Design focused on areas within Naples Bay that provide the highest possible chances for long-term life and benefit. Oysters are known filter feeders that contribute to improving the water quality of Naples Bay, in-line with City goals. The estimated cost of construction for the entire project is \$800,000, and staff was successful in receiving two grants for this project totaling \$514,244.

The City's remaining financial commitment is \$200,000, which has been spread over FY18-19 and FY19-20. This is a multi-year construction project.

#### 19V26 Beach Restoration & Water Quality Improvements (\$100,000)

In 2013, the Stormwater Department submitted a final report entitled: Beach Outfall Management Evaluation to City Council. In it, the report studied various options for the City's nine stormwater beach outfalls and ranked those options in order of impact, permit ability, constructability, and cost. At the April 15, 2013 City Council workshop, consensus was to direct staff to investigate the alternative that includes the consolidation of beach outfalls and discharge into one or more deep ocean outfalls, possibly via a pump station. In FY14-15, staff and its consultant prepared a 30% Preliminary Design Report that demonstrated how the outfall system could be improved by way of two pump stations and several water quality improvement techniques. This effort will include significant community involvement and regulatory process. Therefore, construction is programmed in two phases (north and south). Phase I is schedule for FY20-21. The future goal continues to be a consolidation plan with focus on reducing flooding, improving water quality, improving beach access, reducing beach erosion, improving sea turtle habitat, and eliminating visual impacts of numerous pipes on the beach. In FY18-19, funding is allocated to continuing maintenance of the existing pipes on the beach and any necessary data collection or permitting agency requests associated with the design of the outfall improvement project.

#### 19V07 Street Sweeper Replacement (\$395,000)

Street sweeping is one of the highest rated "best management practices" for improving stormwater quality and protecting stormwater lakes and receiving water bodies such as Naples Bay. Clean streets are an important part in keeping with the City's goal of being the Green Jewel of Southwest Florida. The City is currently permitted with the Florida Department of Environmental Protection under the NPDES program and required to sweep City streets to protect receiving water bodies by improving stormwater quality and decreasing pollutant loadings into the natural resources. This CIP includes the purchase of a street sweeper and 5-year maintenance agreement with the manufacturer. The City currently owns a 2012 Elgin street sweeper. It has over 12,461 operational hours logged; the standard replacement threshold is 10,400 hours for a municipal street sweeper. Current sweeper has a contracted buyback rate of \$40,000 from the manufacturer.

#### 19V05 Stormwater Pipe Lining (\$100,000)

Like any underground structure, buried stormwater drainage pipes deteriorate over time through a variety of impacts. Deterioration can include pipe cracking, disjointing, and root infiltration and can significantly impair stormwater flows, water quality, and water conservation. Cracked and disjointed pipes allow groundwater to infiltrate and be conveyed to receiving water bodies, adding unnecessarily to fresh water inflows, thereby affecting ecology. Infiltration also allows sand and sediment to penetrate the pipe thereby causing settlement on the ground or pavement surface and suspended solids to be conveyed to receiving water bodies. Pipe lining is 50% to 75% less expensive than replacing underground pipe. Lining is a non-invasive process, as there is minimal disruption to pavement, landscape, and traffic. Cured in place pipe lining creates a new inner load-bearing pipe, which is independent of the old host pipe, and remains fully functional in the eventuality of the old pipe deteriorating completely. The lining can be applied in any material and shape pipe.

#### 19V27 Citywide SW Lake Maintenance & Improvements (\$150,000)

Stormwater ponds, also commonly referred to as lakes, are one of the most important ways pollutants are removed from stormwater runoff. Lakes also provide flood protection by attenuating large volumes of stormwater. In FY18-19, \$50,000 of the total amount in this CIP would be allocated towards an update of the City's 2012 Lake Management Plan that categorizes lakes by ownership and level of impairment and further makes recommendations for improvements. The remaining balance of the CIP funding would be allocated to minor improvements and repairs to lakes that may include, spot dredging, new aeration systems, floating islands, mineral, biological and chemical treatment systems, the creation of littoral shelves, and exotic vegetative removal. In out years, the budget continues to fund minor improvements along with design of larger lake restoration effort in FY21-22.

#### 19V08 Basin V Stormwater Improvements (\$350,000)

Basin V is generally the area of the City south of Creech Road, north of 6th Avenue North, west of Goodlette-Frank Road and east of US-41. The CIP includes cost for construction associated with the Basin V improvements that include new stormwater pipes, inlets, manholes, and swales on 8th Terrace North and 13th Street North. Currently on 8th Terrace North there is a set of percolation boxes that do not connect to a downstream drainage system. One of the primary goals of this project is to connect those boxes to the drainage system that is routed into the existing Willow Lake. Additionally, this project will improve the outfall/control structure of the lake.

#### 19V09 Water Quality Monitoring Equipment (\$30,000)

The ability to deploy multi-parameter water quality monitoring equipment will create an economical water quality logging system for long-term, in-situ continuous monitoring of water quality conditions in Naples waterbodies. Long-term water quality monitoring will: provide information that can be used to gauge the effectiveness of watershed restoration efforts; allow monitoring for threats to long-term water quality; provide information for optimization of watershed management processes and policies; detect contamination and/or disturbance incidents. Multi-parameter sondes can detect a wide range of water quality changes and allow more sophisticated data analysis methods. They provide the information needed to properly manage our waterbodies and thus provide water-based recreational and commercial opportunities and support a healthy ecosystem.

#### 19V10 Stormwater Push Camera & Tracer (\$18,000)

The minimum size pipe that the Department's current camera inspection system can view is 12-inches in diameter. The stormwater management system throughout the City contains a large number of pipes that are less than 12-inches in diameter. A push camera enables staff to view the interior or small diameter pipes to determine whether a pipe is blocked with debris, damaged, or completely collapsed.

PROJECT NAME: Street Sweeper Replacement

PROJECT START:

10/1/2018

END:

DEPAR	RTMENT:	60	Storm Water	r/Drainage		FUND:	470	Storm Wa	ater Fund			
PROJE	CT NUMBE	R:	19V07		CIP	SCORE:		73	D	EPT RANK:		5
PROJE	CT TYPE:	Rep	olacement	V	ISIC	N PLAN:	Gree	en Jewel d	of SW Florida			
PROJECT DESCRIPTION/LOCATION:												
The Department currently owns and operates a street sweeper that is used to pick up road debris throughout the City. The sweeper is operated by one full-time employee. Each street within the City is swept once a month; streets with high tourist activity or special events are swept more frequently.												
JUSTIFICATION: For replacement vehicles, current vehicle make/model/ year, mileage/hours and prior year												
maintenance costs must be included.  Street sweeping is one of the highest rated "best management practices" for improving stormwater quality and protecting												
stormwa	ater lakes and	d rece	eiving water b	oodies such a	s Na	aples Bay.	Clear	streets	are an import	ant part in kee	ping with	n the

JUSTIFICATION: For replacement vehicles, current vehicle make/model/ year, mileage/hours and prior year maintenance costs must be included.  Basin V is generally the area of the City south of Creech Road, north of 6th Avenue North, west of Goodlette-Frank Road and east of US-41. The CIP includes cost for construction associated with the Basin V improvements that include new stormwater pipes, inlets, manholes, and swales on 8th Terrace North and 13th Street North. Currently on 8th Terrace North there is a set of percolation boxes that do not connect to a downstream drainage system. One of the primary goals of this project is to connect those boxes to the drainage system that is routed into the existing Willow Lake. Additionally, this project will improve the outfall/control structure of the lake.

#### CAPITAL IMPROVEMENTS PROGRAM

#### **Recreation Funds**

The three funds included under this title are:

- Beach Fund (Fund 430)
- Tennis Fund (Fund 480)
- Community Development Block Grant (Fund 130)

#### The Beach Fund CIP (Fund 430)

The Beach Fund receives the majority of its revenue from beach parking fees.

Major projects are managed by Community Services and include the continued repair and upgrading of walkways and parking expansion at Lowdermilk Park (\$70,000), beach access ADA improvements (\$45,000), and removal of exotic/invasive plants (\$30,000).

City employees remove litter, algae, and rocks along public access beach portions, using a beach cart. These carts tend to have an estimated useful life of one year due to deterioration from sand and water. The Beach Cart (\$14,000) is fully funded from a TDC Grant.

One of the Beach Specialists' all terrain ATVs (\$15,000) managed by the Police Department has met the 15-point criteria and is scheduled for replacement. The Police Department is also requesting the replacement of the ATV storage garage (\$90,000), which has been in use for over 20 years.

In addition, security cameras (\$70,000) are requested in order to provide live video feed of beach activity.

#### The Tennis Fund (Fund 480)

Existing tennis court lighting is planned to be replaced with LED lights. FY18-19 (\$100,000) allows for a lighting study to be completed, specifications for new lighting to be developed and, for conversion to LED lighting on one court for demonstration purposes. FY19-20 funding allows for replacement of poles and light fixtures, for the remaining courts. A full cost estimate will be available once the lighting study is complete.

#### **Community Development Block Grant Fund (Fund 130)**

The federal allocation available from Collier County was approved in the amount of \$85,740 and will be used for outdoor fitness equipment at Charlie C. Anthony Park. The City has estimated the cost of the requested fitness equipment at \$172,500. The Capital Project Fund will cover the remaining \$86,760. The Community Services Department (CSD) held a series of public meetings with Naples residents in connection with the development of a comprehensive Parks Master Plan. The installation of outdoor exercise equipment was requested by residents. The park is a heart shaped, 7.92 acre park on the Gordon River, providing activity space, a fishing pier, walking trails, a basketball court, a tennis court, and picnic shelters. This project will serve as a long-term enhancement to the park consistent with resident requests.

#### **CAPITAL IMPROVEMENTS PROGRAM**

#### Other Funds

The funds included in this section are:

- Technology Services Fund (Fund 520)
- Equipment Services Fund (Fund 530)
- East Naples Bay (Fund 150)

#### The Technology Services Fund (Fund 520)

Technology Services, one of the City's internal funds, manages the rollout and installation of technology projects. FY18-19 projects include:

•	Security Camera Project	\$ 30,000
•	Hyper-V Virtual Host Servers	\$ 45,000
•	Storage Area Network	\$ 95,000
•	Station 1 Data Center	\$150,000

#### The Equipment Services Fund (Fund 530)

Equipment Services, one of the City's internal funds, is requesting the purchase of a replacement facility standby generator (\$80,000) and the replacement of 6 portable vehicle lifts (\$50,000) for FY18-19.

#### The East Naples Bay Fund (Fund 150)

East Naples Bay is a Taxing District with a millage rate of 0.5000. The district was established by referendum in 1987 to accomplish maintenance dredging in the channel and waterway within the district and to maintain necessary aids to navigation. The only planned project, possibly in FY20-21, is one to remove rock from the channel.
