## City of Naples, Florida Debt Administration Overview

The City Manager and the Director of Finance are responsible for the administration of the City's debt; however, City Council is ultimately in charge of approval of the form and dollar amount of all of the City's borrowings.

The Debt Management program is part of the comprehensive City of Naples Financial Policy. The details of the outstanding debt obligations such as original amounts, outstanding balances, fiscal year principal and interest are shown in the Debt Summary Schedules in this section.

## Debt Issuance Procedures

Before the issuance of debt, considerations for capital projects to be funded by debt are carefully analyzed against the current and future needs of the City.

The Finance Department, with the aid of its consultants, coordinates the issuance of debt, such as sizing the new issue, structuring the debt, identifying the repayment sources and determining the mix and method of sale. The City, as a practice, structures all long-term debt with prepayment options except when alternative structures are more advantageous. The City's Debt Service requirements reflect its Fiscal Policies regarding the prudent use of tax-exempt financing.

## Legal Debt Limits

There is no limit established by either the City or the State on the amount of debt the City may incur.

Since neither State law nor the City Charter provide any fixed or arbitrary limits on the amount of debt the City may incur, the following guidelines help ensure that the City monitors its debt capability.

## Debt Administration Overview

## Interfund loans

An interfund loan allows borrowing between city funds, with or without an interest component. One fund (or funds) provides cash to another fund for some specified purpose, such as capital, operating or cash flow. The fund that received the cash repays it over time.

Under certain circumstances, the City will create an interfund loan to assist a fund in accomplishing a goal of the City. Generally, interfund loans are of a small dollar amount, and of a short term nature, such that costs of a bank loan or bond would have been disproportionate. In the case of the City Dock Fund, it was not fiscally prudent to issue a bond or obtain a bank loan before utilizing the other available city government funds. After consideration of the above factors, interfund loan financing of the City Dock Fund was approved with Resolution 17-13935. During FY 2017-18 the Dock project final cost finished lower than budgeted, therefore staff proceeded to adjust the loan by prepaying $\$ 400,000$, thus lowering the annual interest cost.

The City has not established a policy related to interfund loans, because each need is analyzed on a case by case basis. Terms of interfund loans are extremely flexible but usually include an interest rate for a similar term of the Bloomberg Municipal Bond Index.

The following interfund loans are budgeted and outstanding.

| Recipient Fund | Approximate Balance <br> $\mathbf{9 / 3 0 / 2 0 2 0}$ | Expected Payoff |
| :--- | :---: | :---: |
| City Dock Fund Interfund Loan | $\$ 5,185,000$ | 2037 |
