Questions?

What is our Scope of Work

The Scope of Work advertised for this effort included:

“...to oversee and conduct the public input process, helping to identify issues, draft questions to solicit input and conduct the surveying process.”

“This process is expected to include a **qualitative phase** identifying key issues in the community through a public input process through meetings, focus groups and assessing the current Vision document. This would result in a survey to be conducted in a **quantitative phase** where the opinions of the community would be gathered and prioritized in response to the key issues identified in the qualitative phase.”
