ZONING NOTES

Downtown District (D)

Sec. 58-915 - Parking facilities generally, landscaping

(7) Landscaping of parking lots.

- At least 30 square feet of landscaping shall be provided for each on-site parking space.
- Landscaping, and on-site water retention as referenced in Section 30-342, shall be located in such a manner as to divide and break up the expanse of paving and provide a measure of shade and visual relief.
- Landscaping shall be located so as to enable the interconnection of parking aisles on abutting properties.
- Each separate landscaping area shall have a minimum dimension of 5 feet and a minimum area of 30 square feet.
- Trees used for parking lot landscaping shall be canopy trees and must be a minimum of 10 feet in height at the time of planting.
- All landscaping areas must be irrigated and maintained.
- Each separate landscaped area shall include at least 1 tree, with the remaining area adequately landscaped with shrubs, ground cover, or other approved landscaping material. The total number of trees shall not be less than 1 for each 100 square feet or fraction thereof of required landscaping.
- The front of a vehicle may encroach upon any landscaped area when the area is at least 5 feet in depth per immediately abutting parking space and protected by wheel stops or curbing. Two feet of such landscaped area or walkway may be part of the required depth of each abutting parking space.

(8) Landscaping of front yards. Refer to sections 58-909 and 58-912. Trees required in setback areas adjacent to streets as required setback zones are as follows:

- General standards.** All materials shall meet grade Florida #1 or better, as prescribed in Grades and Standards for Nursery Plants, latest edition. Existing trees that are of sufficient size and health may be retained to meet the provisions of this section. All trees shall be planted 30 feet on center. Minimum size at time of planting for canopy-type trees shall be 16 to 18 feet overall height with minimum 3½-inch caliper. Minimum size at time of planting for palm trees shall be 10 feet of grey wood.
- Authorized trees.** The following trees are authorized for the following areas:
 - U.S. 41: Live oak (*Quercus virginiana*). However, royal palm (*Roystonea leata*) may be substituted for live oak to accentuate building main entranceways, for up to 30 percent of the total trees required under this provision.
 - 10th Street: Royal palm (*Roystonea leata*).
 - Central Avenue: Black olive (*Bucida buceras* "Shady Lady").
 - 8th Street: Mahogany (*Roystonea leata*).
 - 6th Avenue North: Hong Kong orchid (*Bauhinia blakeana*).
 - 5th Avenue North: Mahogany (*Roystonea leata*).
 - 4th Avenue North: Golden rain tree (*Koeleruteria elegans*).
 - 2nd Avenue North: Silver trumpet tree (*Tabebuia cariba*).
 - 1st Avenue South: Mahogany (*Roystonea leata*).
 - 12th Street: Mahogany (*Roystonea leata*).

Sec. 50-74. - Development standards.

(c) Areas adjacent to interior property line. On any parcel providing an off-street parking area or other vehicular use area, storage area, outdoor dining area or loading area there shall be provided landscaping between such area and such property line as follows:

(2) Areas adjacent to commercial or industrial uses. Where such area abuts property zoned or in fact used for commercial or industrial purposes, only the tree provision with its planting area as prescribed in this subsection shall be required.

(d) Interior landscaping for vehicular use areas.

(1) Area to be landscaped.

a. Minimum area per parking space. Off-street parking areas shall have at least 20 square feet of interior landscaping for each parking space, excluding those spaces abutting a perimeter for which landscaping is required by other subsections of this section.

b. Minimum area relative to other vehicular use areas. In addition, other vehicular use areas, such as new or used car sales lots, shall have 2 square feet of landscaping area for each 100 square feet or fraction thereof.

c. Determination of size of vehicular use areas. Where the property contains both parking areas and other vehicular use areas, such as new or used car sales lots, the 2 types of areas may be separated for the purposes of determining the other vehicular use areas by first multiplying the total number of parking spaces by 300 and subtracting the resulting figure from the total square footage of paved areas.

d. Minimum size of landscaped areas. Each separate landscaped area shall contain a minimum of 50 square feet and shall have a minimum dimension of at least 5 feet.

(2) Plant materials.

a. Generally. Each separate landscaped area shall include at least 1 tree having a clear trunk of at least 5 feet, with the remaining area adequately landscaped with shrubs, ground cover or other approved landscaping material.

b. Minimum number of trees. The total number of trees shall not be less than 1 for each 100 square feet or fraction thereof of required interior landscaping areas.

c. Location of landscaped areas. Such landscaped areas shall be located in such a manner as to divide and break up the expanse of paving and at strategic points to guide traffic flow and direction.

(3) Exception. In other vehicular use areas where the strict application of this subsection will seriously limit the function of such area, the required landscaping may be located near the perimeters of the area, including such perimeters which may be adjacent to the building on the site. Such landscaping shall be in addition to all other landscaping requirements.

Contractor shall verify that he has the most up to date plans, and that they have been approved and accepted by the Owner before commencing construction.

Notes

- All Plants shall be Florida No. 1 or Better.
- Landscape Contractor shall review plans and indicate any availability problems at time of bid. Landscape contractor shall be responsible bidding and installing all plantings as they are drawn on the plan, and shall verify the accuracy of the plant list vs the drawn plan, at the time of bid.
- All plants indicated in zones C or S are susceptible to damage from cold temperatures.
- Contractor shall maintain all plantings until acceptance by Owner.
- All beds shall be weed free until acceptance to owner. Wherever weeds are present in turf beds or landscape beds, a round up application to kill these weeds before sodding or planting shall be required.
- All Trees and Palms shall be warranted for a period of 6 months. All Shrubs shall be warranted for period of 90 days. All Sod shall be warranted for a period of 30 days. Warranty begins at time of acceptance of project.
- All Sod shall be warranted for 30 days.
- It is the landscape contractor's responsibility to coordinate w/ the irrigation contractor to ensure adequate coverage exists.
- Contractor shall install a Bio Barrier Fabric around all palms within 4' of pavement or planter walls, and all large canopy trees with 10' of sidewalk.
- Contractor shall be licensed and insured.
- Contractor shall maintain site in a clean fashion and shall remove any waste that he creates.
- Landscape Contractor shall have a pre-construction review of plans w/ Landscape Architect prior to ordering plant material, to verify plans are current, and that no changes are necessary. Contractor shall also schedule a walk thru to allow Landscape Architect to review flagging and placement of all plant material prior to installation. These above mentioned meetings are important to the quality control of the project. Landscape contractor understands that if work commences without these meetings, that the owner and Landscape Architect have the ability to make field changes to the plans at the Landscape Contractor's expense.
- General Contractor / Site contractor shall make certain that all soil for planting areas shall be of suitable landscape quality. Soil shall be comprised of a sandy, base, and have good organic and good percolation qualities.
- General Contractor / Site contractor shall make certain all limelock, unacceptably compacted soils shall be removed from planting beds.
- Landscape Contractor shall make certain that the site conditions meet their satisfaction before a staking plant material.
- Landscape contractor has any concerns over the survivability of plant materials, he must inform the owner immediately.
- Contractor to confirm any pest (Deer, Rabbit, etc) issues prior to planting and provide appropriate solution to alleviate issue, incorporate deterrents, or suggest alternate plant materials.

Palm Tree Staking Detail

Tree Stakes are to be removed between 6-12 months by the Owner.

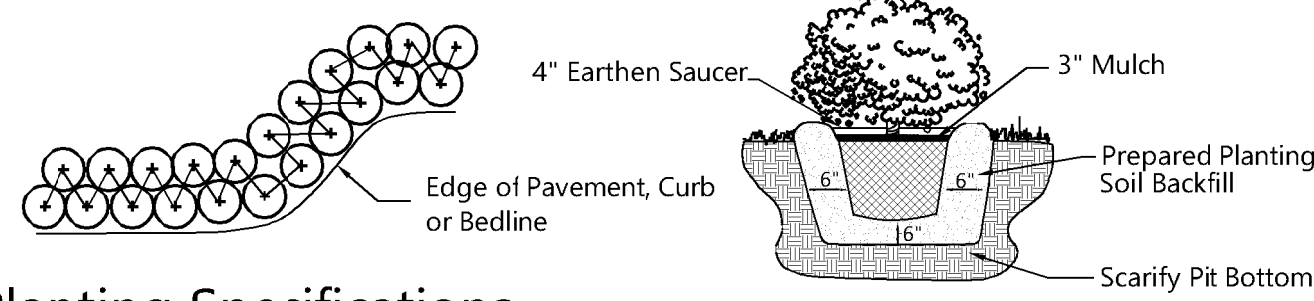

Tree Staking Detail

Tree Stakes are to be removed between 6-12 months by the Owner.

Shrub & Groundcover Planting Detail

NOTE: All Shrubs And Groundcovers Shall Be Triangular Spaced Along Straight Edges And Will Be Planted In Parallel Rows Along Curved Edges.

Groundcover & Annual Detail

NOTE: Annuals Are To Be Planted As Per Groundcover Detail Excluding Mulch.

Notes

All Plants shall be Florida No.1 Contractor Shall be familiar w/ the Landscape code and shall comply with all of its applicable requirements.

Planting Specifications

QUALITY: All plants shall be Florida No.1 or better as given in Grades & Standards for Nursery Plants, Parts I and II, latest edition published by the Florida Department of Consumer Services.

RESEARCH: Contractor shall research plans and site to determine present location of utilities and obstructions before commencing work.

The contractor shall personally examine the project site and fully acquaint himself with all of the existing conditions in order that no misunderstanding may occur.

No Additional compensation will be granted, after bid has been let for any hardships the contractor may encounter in the performance of his duty.

DRAWINGS: Drawings are part of this contract. Any discrepancies between the drawings and specifications shall be brought to the attention of the owner at time of bid.

SCOPE: Under this contract, the work consists of furnishing all labor, material, equipment, transportation, etc., to complete all landscaping work as shown on the Drawings, as included in the Plant List and as herein specified.

The contractor shall be responsible for all planting/ maintenance of plants until acceptance by Owner. Contractor shall protect all existing structure, plants etc., from damage during the construction process.

All damage shall be repaired at the contractors expense

WARRANTY: All trees shall be warranted for a period of 1 year. All shrubs and groundcovers shall be warranted for a period of 90 days, and sod shall be warranted for a period of 30 days.

REPLACEMENT: All plant replacements shall be done with the same size and species of plant: that was specified.

SAMPLES: Samples of any landscape material may be required for approval on the site or as otherwise determined by the Owner. Upon approval of samples (i.e. mulch, planting soil, plant varieties, etc.) by the Owner, delivery of material may begin.

The landscape contractor shall be responsible for fine grading of the site. This means that the site shall be brought within 1" of final grade so that the landscape contractor will be able to perform final grading.

SUBSTITUTIONS: Any substitutions made for any reason must be approved by the owner.

WATER: It is the contractors responsibility to obtain and adequately water the plants during the duration of the installation phase.

CONTAINER GROWN MATERIAL: All container grown materials shall be healthy vigorous, well rooted plants, and established in the container so that the root mass will retain its shape and hold together when removed from the container.

PALMS: Only a minimum number of fronds shall be removed from the crown of palm trees to facilitate moving and handling. Cabbage palm heads shall be tied with a burlap strip per the following procedure.

PALMS: Clear trunk (c.t.) shall be measured from the ground at time of installation to the point where the mature aged trunk joins the immature green portion of the tree.

SHADE TREES: Height shall be measured from the ground to the avg. height of canopy. Spread shall be measured to the average outer edge.

SHRUBS: Height shall be measured from the ground to the average point where mature plant growth stops.

SOD: Sod shall be measured on the basis of square footage. Contractor shall be responsible for coverage of the square footage shown on the plans.

MULCH: Apply 3" Pine Straw mulch to all planting areas. Keep mulch from piling up along the base of the tree and shrubs.

FINE GRADING The landscape contractor shall be responsible for fine grading of the site. This means that the site shall be brought within 1" of final grade so that the landscape contractor will be able to perform final grading.

PLANT LAYOUT: All bed areas shall have planting laid out prior to planting.

The Landscape Architect shall review all layout prior to planting, if the bed and shrub layout is not inspected prior to planting, the Landscape Architect reserves the right to relocate the plants.

Soil within planting beds shall not be compacted. All compacted sub-base/ shell is to be removed from all landscape areas.

Table with 2 columns: BACKFILL/SOIL MIX and ANNUALS. Rows include 50% decomposed organic matter (muck) and 100% Potting Soil.

FERTILIZER: Two fertilizers shall be used in all types of plantings except palms. Granular fertilizer shall be uniform in composition, dry and free flowing.

Table with 2 columns: PLANT SIZE and GRAIN FORM. Rows include 1 gal, 3 gal, 7-15 gal, 1"-6" caliper, and 6" and larger.

Magnesium sulfate or "Pam Special" will be applied to all palms at installation at a rate of 1/2 lb. per inch of trunk caliper.

PRUNING: Each plant shall be pruned to complement the natural character of the tree. All dead and brown fronds, leaves, branches shall be removed.

TREE GUYING AND BRACING: Firmly stake or guy all trees in accordance with the plans and planting details immediately after planting to prevent wind damage.

WEED CONTROL: All landscape areas shall be free of nut grass, torpedo grass, and other noxious weeds.

PLANT MAINTENANCE: Contractor shall maintain all plants until final acceptance by owner.

CLEAN-UP: Contractor shall clean site area every day. The site shall be devoid of all rubbish, landscape debris, containers.

PLANT SCHEDULE AMENITY DECK table with columns: TREES, PALMS, SHRUBS, GROUND COVERS, and AGGREGATE SHELL.
