Signature of Petitioner's Agent Date

(d) Except where the proposal for the rezoning of property involves an extension of an existing district boundary, no change in the zoning classification of land shall be considered which involves less than five acres of land, except for the "C" Conservation zone district, in which the subject property is not required to have street frontage, and the "PS" Public Service zone district, in which the subject property may have a minimum lot of 30,000 square feet and minimum lot width of 150 feet.

See attached Summary of Facts.

Residential Impact Criteria

Pursuant to Section 46-43(d), petitions which result in the establishment, expansion or intensification of a commercial activity on property containing residential units, within 300 feet of a property containing residential units, or within 300 feet of a property zoned for residential use, shall also comply with the following Residential Impact Criteria:

- (1) Illumination. Illumination levels shall not exceed 0.5 footcandle at the lot lines of the subject property. In addition, the standards for illumination set forth in Section 56-89 shall also be met.

See attached Summary of Facts.

- (2) Noise. Physical barriers exist and operation plans are in place to insure that noise levels shall be consistent with those identified in Section 22-37. Businesses with external speakers such as outdoor live entertainment, drive-thru lanes and automotive dealerships, must take measures to ensure that speakers are pointed away from residences and sound is buffered.

See attached Summary of Facts.

- (3) Parking and access. Parking must meet the minimum requirements and be adequate to avoid any overflow into the residential area. Parking areas shall be situated and buffered to avoid impacting the residential areas. Primary vehicular ingress and egress shall, where possible, be located to avoid conflict with traffic in the residential area. Pedestrian connections with public sidewalks and residential areas are encouraged.

See attached Summary of Facts.

(4) Landscape buffer. Landscaping provides adequate screening between the commercial activity and the residential units including buffering noise and the glare from vehicular headlights. Based on the project design and surrounding development patterns, additional landscaping and screening may be required to provide adequate buffering as determined by the City Council. Where possible, existing landscaping buffers shall be upgraded to meet or exceed the requirements of Chapter 50, Article III, Landscaping and Tree Protection.

See attached Summary of Facts.

(5) Mitigation of hazardous or adverse impacts. All hazardous or adverse impacts to adjacent residences in adjacent residential zoning shall be adequately addressed in a mitigation plan to minimize or eliminate such hazardous or adverse impacts. The City reserves the right to require additional mitigation when it finds the identified impacts are not adequately addressed.

See attached Summary of Facts.

(6) Hours of operation. Where the proposed hours of operation extend to between 9:00 pm and 8:00 am, the security measures shall be taken to insure monitoring of the premises including parking areas.

See attached Summary of Facts.
