 - Will the fees be waived?
 - Please provide fee schedule.

The City is in the process of obtaining the building permit and hopes to have it issued at time of contract award. If any other local permits are required, they will be the responsibility of the contractor and the fees will be reimbursed by the City.

3. Is project funded? If so, what is source(s) of funding?

Answer: Yes, the City will be providing the funding.

4. Will Prevailing Wages be required? Please indicate which rates.

Answer: NO prevailing wages are not required.

5. Please provide a complete list of applicants for the pre-qualification phase of this project.

Answer: https://www.naplesgov.com/rfps?field_bid_rfp_status_value_1=awarded&page=34

6. Will contractors who were not originally pre-qualified to bid be allowed to re-apply for consideration during this phase of the construction ITB?

Answer: Yes

How many additional contractors will be considered?

Answer: As of right now, no one. However, they have until the bid opening to submit a package.

How many maximum could be qualified during this phase?

Answer: That is unknown at this time.

Will those who did not originally qualify during last year's prequalification have to submit the information needed for RFQ 23.036 as well as the bid documents required for this ITB?

Answer: Please see Addendum 1 at <https://www.naplesgov.com/purchasing/page/24-011-naples-pier-reconstruction-itb>

7. What is the anticipated construction start date?

Answer: See Page 47, Section D, of the solicitation.

8. Who will be responsible for on-site engineering, inspections and testing?

Answer: The engineer (THA) will be working for the City to perform on site oversight and inspections. Pile testing and concrete testing are the responsibility of the contractor. Any engineering required for alternative design submittals will be the responsibility of the contractor.

9. Will barges be required to be ABS load line certified for inland work? For off-shore disposal?

Answer: Yes, barges working at the pier and disposing material offshore will be required to be ABS load line certified.

10. Will contractors be permitted to spud barges overnight at the jobsite?

Answer: Yes

11. Any other barge restrictions?

Answer: No

12. Will PDA's suffice for pile testing?

Answer: PDA will suffice for compression and uplift capacity calculations. PDA testing will be performed by the contractor and data provided to engineer for analysis. Contractor shall include cost of PDA testing in their bid.

13. Schedule of values item #6 indicates 1,000 linear feet but only 4 units. Please clarify, 4 each at 250' long? Some other multiple?

Answer: A total of (8) vertical piles and (2) battered piles are to be tested, each 100' in length. They will be spaced along the length of the pier. Plans will be revised to show exact locations. An additional (2) 100' vertical piles are to be installed in non-permanent locations, one within the mid-pavilion footprint and another within the end pavilion footprint and be laterally load tested to failure then removed to at least 2' below the mudline. Disposal of the failed test piles or sections thereof shall be in accordance with the requirements of the demolition and removal specifications. The lateral load test piles will be added as a separate line item on the SOV. EOR or Representative must observe the installation and testing of all test piles.

Please see Attachment A: Revised Schedule of Values

14. Please clarify test pile locations (bents), lengths and associated criteria.

Answer: The Contractor shall submit to the EOR a Pile Installation and Testing Procedure to be followed during the test pile program and shall become the basis for the installation procedures for the remaining production piles. All test piles will be tested during installation using a Pile Driving Analyzer (PDA) in accordance with the current FDOT specifications for PDA tested piles. Vertical and Battered test piles may be installed in permanent locations and left in place after testing. Laterally loaded vertical test piles will be installed in non-permanent locations as specified above.

EOR or Representative must observe the installation and testing of all test piles.

See also response to number 13 above.

15. Is it the intent to install test pile in permanent locations or sacrificial as indicated in the geotechnical report.

Answer: Compression load test piles may be installed in permanent locations. Lateral load test piles are to be sacrificial.

16. Will the contractor have to wait for the test program results in order to procure production pile?

Answer: The purpose of the test pile program is two-fold.

1. To determine the adequacy of the Contractor's equipment, means and methods to install piles to the required specifications.
2. To determine the production pile lengths for the project.

Pile lengths will be provided by sections as outlined in the plans within 5 days of installation and testing of the test piles.

Alternatively, contractor may elect, at their own cost and risk, to purchase all 100' piles if they do not wish to wait for the test pile program results to begin production. If 100' piles are not adequate, contractor will be responsible to purchase longer piles.

17. Please provide bid pile lengths. The schedule of values item #7 15,500 linear feet does not seem to add up to what is indicated in the geotechnical report.

Answer: Bid pile lengths are based on (60) 70' piles and (122) 100' piles. (10) of these are to be 100' test piles and so are included in line item 6 instead of 7.

18. Please clarify what SOV item 5 Artificial Reef Material Prep will encompass and how the contractor will quantify the hours and be paid. What if the prep time is substantially more?

Answer: Please refer to page G102 of the plans for requirements. An observer, who the contractor is not responsible for hiring, will need to verify the material has been substantially prepared. Contractor will need to document the amount of time spent, and engineer may elect to observe the preparation process at any time. The quantity in the SOV is an estimate. If actual time is substantially more then the contractor will receive additional payment at the same hourly rate. We tried to estimate high.

19. Are we required to bid the optional 14" concrete pile items?

Answer: Yes. They will not be used in the project but FEMA needs to know what the cost would be so that they can compare the cost of the new piles (18") vs using the same size piles that were on the old pier (14").

20. With the general safety of the public in mind, is there possibility to reconsider beach closure(s) during construction?

Answer: Beach will need to remain open. Short periods (Hours) of closures as needed could be permitted.

21. Firstly, we would like to inquire if it's acceptable to submit the same reference questionnaire forms that we provided during our pre-qualification for this bid. These forms highlight the projects and clients that best showcase our expertise and similar services.

Answer: Please reference page 45 of the ITB solicitation.
